

Lucane Groupware

FOSDEM 2004

Presentation :

- Platform
 - Features
 - Architecture
- Applications
 - Administration
 - Messaging
 - Files
- What's next
 - Evolutions
 - How to help

Project summary :

Lucane is a free groupware platform written in Java, designed with extensibility in mind and published under the LGPL.

The platform as a whole provides an ease of development for your networked applications :

- Object based network protocol
- Client/Server and peer to peer
- User and group management
- Multi language system
- ...

Some applications are bundled with the platform :

- A peer to peer quick message system
- File sharing
- Forum
- Calendar
- Mail client
- ...
